

ME209 Engineering Statistics Notes

1 Lecture — 28/09/2026

Curriculum Position

- Week 2 — Intro to Probabilities

Key Content

1. Finding Percent Quartiles
2. Intro to Chapter-2 : Probabilities
3. Sample Spaces
4. Event Spaces
5. Complements, Unions, Intersections
6. Permutations, Combinations, and Counting Problems
7. Circular Permutations
8. Probability of an Event
9. Conditional Probabilities

Instructor Emphasis

- The main textbook has plenty of exercises.
- This lecture corresponds to Chapters 1 and 2 from the main book; 1 and 6 from the 2nd book.

Announcements

1. Sufficiently explicit solutions are expected in the exam.
2. There won't be definition questions in the exam.

Open Questions

Independent Follow-up

- Go over the content in the books.
- Work on public speech and social anxiety.

2 Lecture — 05/10/2026

Curriculum Position

- Week 3 — Continuation of Last Lecture, Mostly Sample Spaces

Key Content

1. Describing Sample Spaces
2. Conditional Probability Questions Based on Sample Space Machinery
3. Independent Events

Instructor Emphasis

- Check out the examples in the textbooks.

Announcements

Open Questions

Independent Follow-up

- Review both books and go over the practice problems.
