

ME241 Principles of Thermodynamics Notes

1 Lecture — 28/09/2026

Curriculum Position

- Week 2 — Energy

Key Content

1. Quick remission of last week.
2. Forms of energy.
3. Stationary systems.
4. Mechanical energy.
5. Energy transport.

Instructor Emphasis

- No lecture notes provided, but the course closely follows the main textbook.

Announcements

1. Lecture will start 15 minutes after the scheduled time.
2. Energy transfer topics are next week.

Open Questions

Independent Follow-up

- Review the fundamental concepts in the main textbook.

2 Lecture — 05/10/2026

Curriculum Position

- Week 3 — Energy Transfer

Key Content

1. Quick Recap of Previous Weeks
2. Energy Transport Mechanisms
3. Heat Transfer Modes of Energy Transport
4. Energy Transfer by Work
5. The First Law of Thermodynamics
6. The First Law for Cycles
7. Energy Conversion Efficiency
8. Higher and Lower Heating Values

Instructor Emphasis

Announcements

1. Quiz-1 is next week, expect simple Law-1 questions.

Open Questions

Independent Follow-up

- Go over the concepts in the textbook, complete the relevant exercises
